

SweeperHose

Spiral hose for abrasive media

Highly flexible sweeping machine hose, for the utilization in street-, airfield- and large sweeping machines of all well-known manufacturers, produced in high-quality hand manufacturing. **SweeperHose** is primarily used as a vacuum channel in sweeping machines, but is additionally applicable as a foliage suction hose. Our lately developed rubber compound GruloRub makes **SweeperHose** extremely wear-resistant and guarantees a very long endurance, high flexibility and axial mobility. The variable composition of rubber quality, profile and wall thickness enables an individual adjustment to the respective vehicle type. This hose is especially manufactured upon your requirements. Please inform us about the nominal width, hose and sleeve length or the sweeping machine type, to ensure that we can provide an individual offer to you.

Technical characteristics

Temperature range: -30 °C to +80 °C

Standard Length: On Request

Colour: Black

Construction

Cover: Abrasion-resistant, NR/SBR-cover resistant to weather with material impression

Reinforcement: Tear resistant textile cord, steel spiral

Lining: High abrasion-resistant, corrugated natural caoutchouc tube

Inner-Ø mm	Wall thickness mm	Bending radius mm	Weight/m kg	Article no.
180	5,00	360	6,200	12009-180-005
203	8,00	440	7,900	12009-200-008
254	8,00	500	9,800	12009-254-008
282	8,00	560	11,530	12009-282-008

This hose is especially manufactured upon your requirements.
